METTLER TOLEDO

Rainin XLS+ Multichannels

Lightweight, Superior Performance

The new Rainin XLS+™ multichannel pipettes by METTLER TOLEDO raise the bar on multichannel pipetting and performance. The new models are up to 35% lighter, which means they are easier to maneuver and easy on your hands, even after hours of pipetting.

XLS+ pipettes are Rainin's most technically and ergonomically advanced multichannels available. Equipped with Rainin's patented LiteTouch™ System (LTS™) technology, these multichannel pipettes are easy on your hands and deliver precise and consistent sample pickup across all channels. Built rugged and with premium quality materials, these multichannels will deliver years of consistent, reliable service. And like all Rainin XLS+ pipettes, the embedded RFID tag supports advanced calibration tracking.

Lightweight

At last... comfort and performance, even after hours of pipetting! Rainin XLS+ multichannels are lightweight, yet balanced and substantial, with a fit, feel and finish that is truly world class.

Greater control

Rainin XLS+ multichannels are among the easiest and the most responsive multichannel pipettes you'll ever use. On all models and volume ranges, operation is smooth and absolutely consistent from start to finish.

Lightest touch

Choose Rainin's patented LiteTouch System (LTS) for ergonomics and ease of use. With a small seal and positive stop, tips load quickly, seal perfectly and are easy to eject.

Channel consistency

With a small seal and positive stop, LTS provides a fast, perfect seal across all channels. No rocking or hand-tightening required... ever! Perfect seals result in consistent sample pickup on all channels – first time, every time.

Faster throughput

Speed plate work with the Rainin E4 XLS+ electronic multichannel pipettes. Specialized modes streamline how you transfer multiple aliquots, perform serial dilutions and program complex pipetting routines.
